DETAILED ACTION

I. Rejection of claims 34-44,46,47,52 under 35 USC 103(a) as being obvious over Louvet in view of Lukenbach and Hahn will not be maintained in light of amendment filed 8/24/06. Prior art does not teach a method wherein a subject is incapacitated.

II. Rejection of claims 34,35,39-47,52 under 35 USC 103(a) as being obvious over Hahn in view of Lukenbach will not be maintained in light of amendment filed 8/24/06. Prior art does not teach a method wherein a subject is incapacitated.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 34-47,52-60 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "directing" in claim 34-47,52-60 is a relative term which renders the claim indefinite. The term "directing" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Does "directing" mean "applying"?

Art Unit: 1616

The term "sufficient" in claim 52 is a relative term which renders the claim indefinite. The term "sufficient" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Please explain what is meant by "sufficient inflammation to disable the recipient"?

Examiner was unable to reach Attorney Taylor to resolve 112 issues.
